Smart Roaming

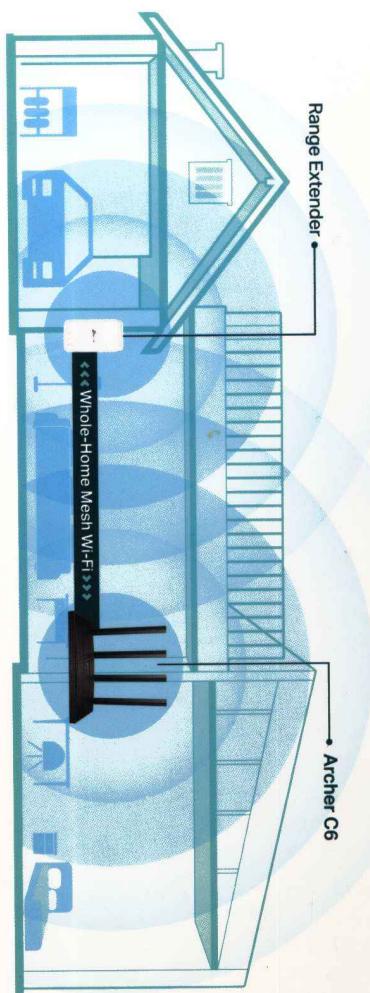

OneMesh

OneMesh™

Flexibly Create a Whole-Home Wi-Fi

Create a Mesh network by connecting one or more OneMesh™ range extenders to your Archer C6 for seamless whole-home coverage.

Wi-Fi Dead-Zone Killer

Eliminate weak signal areas with Wi-Fi coverage for the whole house.

Smart Roaming

Enjoy uninterrupted streaming, surfing and more—even when moving around your home.

One Wi-Fi Name

Stay connected to the same network name in every room.

Unified Management

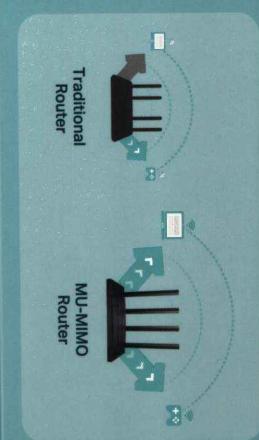

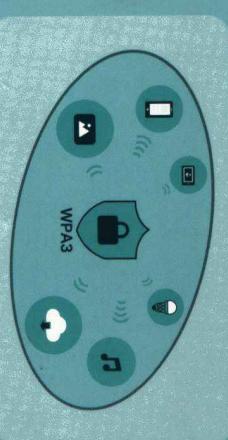

Manage the whole-home Wi-Fi by managing the central node via Tether app/Web UI.

Upgrade to Mesh Network

Enjoy Mesh network without having to replace your existing router by simply updating your OneMesh™ router's firmware. Check full list of OneMesh™ routers and range extenders at:

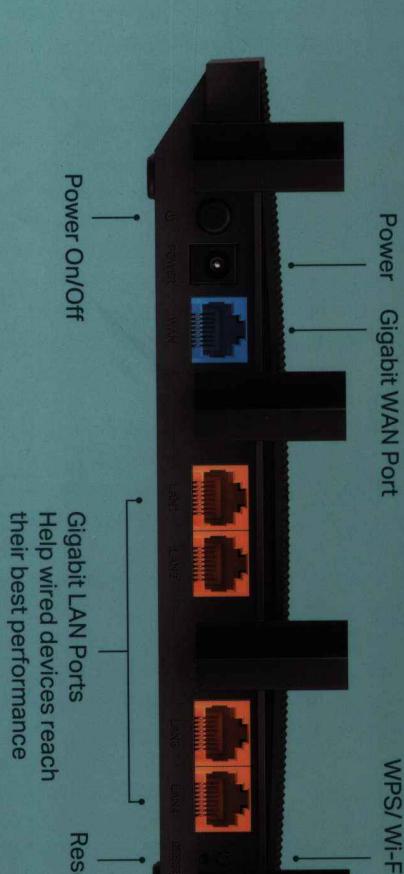

<https://www.tp-link.com/onemesh/c6/compatibility>

*More compatible devices are coming soon.

MU-MIMO

MU-MIMO technology serves multiple at once, reducing wait time, increasing throughput for every device, and making stream more efficient.[#]

10x Faster Connectivity

One Gigabit WAN port and four Gigabit LAN ports deliver speeds up to 10x faster than traditional routers. Let every member of your family simultaneously enjoy high-speed connections on their phones, tablets and laptops.[†]

WPA3 Security

The latest Wi-Fi security protocol. WPA3 provides new capabilities to improve cybersecurity, secure encryption in Wi-Fi password enhanced protection against brute-force attacks, and combine to safeguard your home Wi-Fi.
